

Analyzing Wimbledon: The Power of Statistics
by Franc Klaassen and Jan R. Magnus
Oxford University Press, New York, 2014

last updated: April 2, 2017

Associated with *Analyzing Wimbledon* we present additional information which can be downloaded from this website. The website was launched on Sunday 12 January 2014 and will be updated regularly.

The additional information concerns primarily the large underlying data set and a computer program called *Richard*. More precisely, the current website contains the following:

Advance praise. Advance praise (as on the back cover of *Analyzing Wimbledon*). [\[Praise\]](#)

Richard. A user-friendly graphical interface and the source files with documentation of the program *Richard*, written in Matlab R2012b. [\[Richard\]](#)

Data. The data in Excel 2010 format (22 MB). [\[Data\]](#)

Mathematical derivations. Proofs of selected results not (fully) proved in the book are provided. [\[Proofs\]](#)

Reviews. Reviews that have appeared so far (to the best of our knowledge). [\[Reviews\]](#)

Additions and corrections. These will be added if and when needed.

The authors accept no responsibility for any errors or malfunctions in the data or program.

Comments and suggestions are welcome and should be addressed to [Jan Magnus](#) or to [Franc Klaassen](#).
